Plug plants are young plants. We germinate the seed in our glasshouses and supply them growing in a compost plug.

In the Irish climate it can be difficult to grow vegetables from seed early in the year without a greenhouse or polythene tunnel. We grow a range of vegetable seedlings and supply them to you hardened off and ready to plant out. Some of the seeds below may have to be ordered in for your order, this is not a problem but it may delay sowing time

To order simply email us your Name, Delivery Address, Phone Number and the Plant Code, Plant Name, how many you require and any special instructions – i.e. Courier phone 123456 for direction in town, if package sent via courier depending on order size, we shall then contact you via email to confirm your order, advise of postage cost, and request the 10% order fee.

All plug plants are subject to being ordered in advance, a 10% order fee is payable once order has been confirmed, we have had to take this course unfortunately due to plants being ordered then not wanted when it is time to pay the balance, the order fee is payable by PayPal or cheque, postal order made payable to P. Hunt and sent to above address.

Alternatively you can use this order form simply enter the quantity of the plant that you require in the appropriate box and either email us the order form as an attachment or print out and post it to us, we shall then contact you via email to confirm your order and request the 10% order fee.

Plug plants are 30 cents each unless stated a different price alongside the plant,
Further information is at the bottom of the order form

Plant Code	Plant Name	Sowing	Price Each 30c	Quantity Ordered	<i>Office Use</i>
EXAMPLE	Vegetable Plant	Jan-July		10

VTO270	Super Marmande	Feb-April			

Plug plants are 30 cents each unless stated a different price alongside the plant, Other companies charge upwards of 40 - 50 cents a plant, the reason we can offer them for 30 cents is due to the packing we use recycled boxes and newspaper, we use this method to keep costs down that we would only have to pass onto you, our customer, your plants are still packaged securely, you are not paying the extra for custom made plastic packaging and boxes, All plants are watered thoroughly the day before packing, we only post plants out on Mondays, Tuesdays and Wednesday this is to ensure that you receive the plants the same week,

Sowing times are approximate plug plants are normally ready 4 – 6 weeks after the seed is sown. The balance of the payment is payable only when your plants are ready to be posted out.

We will advise when seed has been sown for your order. Which will give you time to prepare the ground for them.

All prices are plus carriage, we can can advise the cost of carriage when your order is placed
